STATION LEYBURN, N.E.R.

THE RECTORY,
MIDDLEHAM, R.S.O.
YORKSHIRE.

Ans 11.v.11

Dear Sir

I send you my remarks which I made on the days on which no rain is registered. I did not intend then to have the records published, & what doubtless happened was that the rain gauge was frozen tight & I left it till the thaw my temperatures then were not to be trusted. as the max & min were combined in one instrument. then I altered the following month

I find I recorded on Feb 1st ·30 of thawed snow, but the fall no doubt was considerably larger

I trust that this explains my discrepancy with other reports at this time & I will see it does not happen again

Yrs faithfully

J G Topham

January 1910.

If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.
18 JAN 1911

Kept at Mossley 4
in the County of Yorkshire (West Riding)
by Ashton-u-Lyne, Stalybridge & Dukinfield (District) Waterworks.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 636 ft. By Level.

Time of Observation 9 a.m.

Nearest Railway Station
Name Mossley
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
4 JAN 1911

Kept at Moorgate Grange Rotherham
in the County of York
by W Dyson Esq

RAIN GAUGE
Pattern Round Gauge
Diameter of top 8 in.
Height of top above Ground One ft. — in.
" " " Sea Level 262 ft.

Time of Observation 9-0 am

Nearest Railway Station
Name Rotherham
Distance 1 Mile Direction SE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

16 MAY 1911

Kept at New Malton

in the County of York 4

by Matthew B. Slater

RAIN GAUGE
Pattern Square
Diameter of top 10 in.
Height of top above Ground ft. 10 in.
" " " Sea Level 139 ft. 345

Time of Observation 9 Am

Nearest Railway Station
Name Malton
Distance 1/4 mile Direction South

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

EB 1910

Kept at Nun Monkton

in the County of York W Riding

by H Horsfield

RAIN GAUGE:
Pattern Negretti & Zambra
Diameter of top 5 in.
Height of top above Ground — ft. 6 in.
" " " Sea Level 45 ft.

Time of Observation 9 AM

Nearest Railway Station: Name Marston Moor
Distance 2½ miles Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
-9 JAN 1911

Kept at Osmotherley

in the County of Yorkshire 2

by Thomas German

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 0 ft. 8 in.
" " " Sea Level 660 ft.

Time of Observation 8/9 a m

Nearest Railway Station
Name North allerton
Distance 8 Direction S N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

13 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Sewage Farm. Otley.
in the County of York.
by C. F. Hodgson. Engineer & Surv. Otley U.D.C.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 9 in.
" " " Sea Level 168·58 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name Otley
Distance 1200 yds Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance 1 mile Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
4 JAN 1910

Kept at Ripley Castle Gardens

in the County of Yorkshire

by H. Fox Gardener.

RAIN GAUGE
Pattern
Diameter of top 6. in.
Height of top above Ground 1. ft. 3 in.
" " " Sea Level 229. ft.

Time of Observation 9. a.m.

Nearest Railway Station
Name Ripley Valley.
Distance ½ ml. Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
31 JAN 1911

Kept at High Bank, Mickley [illegible] 25 [8]

in the County of W. Riding Northern 12

by Miss Harrison

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 225 ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910.

FORM A2.
BRITISH RAINFALL.
24 JAN 1911

Kept at Greystones (weekly)
in the County of York 8
by Wakefield Corporation.

RAIN GAUGE
Pattern Snowden
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 1175 T ft.

Time of Observation 9 a. m.

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 2 ft. 6 in.
" " " Sea Level 95 ft.

Time of Observation 9. a.m.

Nearest Railway Station
Name Church Fenton
Distance 2½ m. Direction E.N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REG

FORM A2.
BRITISH RAINFALL.

24 JAN 1910

Kept at May Lodge Scarborough.

in the County of Yorkshire

by Mrs Elizth Ritson.

RAIN GAUGE
Pattern
Diameter of top .... in.
Height of top above Ground .... ft.
" " " Sea Level .... ft.

Time of Observation

Nearest Railway Station
Name
Distance .... Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Kept at Scarborough

in the County of Yorkshire.

by The Scarborough Corporation.
per. H. W. Smith.

RAIN GAUGE
Pattern ~~[illegible]~~ Negretti & Zambra
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 169·8 ft.

Time of Observation 9. AM.

Nearest Railway Station
Name Scarborough.
Distance 770 yds. Direction East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance 3 Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

by W. Millhouse

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 94 ft.

Time of Observation 9. am.

Nearest Railway Station
Name Seamer.
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

-3 JAN 191

REGISTER OF RAINFALL IN 1910

Kept at Akay, Sedbergh

in the County of Yorks.

by Chas. Ed. Taylor.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 400 ft.

Time of Observation 9. a. m.

Nearest Railway Station
Name Sedbergh
Distance 1½ miles Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

6 JAN 1911

Kept at Dent

in the County of York

by James Mason

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 484 ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
3 JAN 1910

Kept at Handsworth Water Works Gleadless Sheffield

in the County of Yorkshire W.R

by Richard Rodinson

RAIN GAUGE
Pattern Negretti
Diameter of top 8 in.
Height of top above Ground ... ft. 12 in.
" " " Sea Level 700 ft.

Time of Observation 9 A.M

Nearest Railway Station
Name Sheffield M.R
Distance 2. Direction N.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

2 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Handsworth Water works Gleadless — Sheffield

in the County of Yorkshire

by Richard Rodinson

RAIN GAUGE
Pattern Negretti Zambra
Diameter of top 8" in.
Height of top above Ground ft. 12" in.
" " " Sea Level 700 ft.

Time of Observation 9 A.M

Nearest Railway Station
Name M. R. Station Sheffield
Distance 2 miles Direction N. W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name Midland Sheffield

Distance 4 miles Direction East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name
Distance Direction

As Before.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

26 APR 1911

Kept at West Point, Shipley

in the County of York

by M Paterson

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground — ft. 12 9 in. (on B)
" " " Sea Level 382 ft.

Time of Observation 8 a.m.

Nearest Railway Station
Name Saltaire
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

18 FEB 1911

REGISTER OF RAINFALL IN 1910.

Kept at Skipton Town Hall Yard.

in the County of York. 9

by Urban District Council.
A.E.W. Aldridge Esq.

RAIN GAUGE
Pattern Negretti & Zambra
Diameter of top 8 in.
Height of top above Ground - ft. 9 in.
" " " Sea Level 367 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Skipton
Distance 933 yds Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Form 334.

METEOROLOGICAL OFFICE,
63, Victoria Street, London, S.W.,
August 18 1910.

RETURN FROM CLIMATOLOGICAL STATION.

Sheffield, July 1910.

DEAR SIR,

On examining the above Return and comparing the observations with our Charts, &c., the following queries arise. I am directed to ask if you will be kind enough to refer to your original observation book, and return this paper, with the further information required, as soon as possible.

To E. Howarth Esq. F.R.A.S.
Weston Park Museum

Yours faithfully,
R. G. K. Lempfert
Superintendent of Statistics.

QUERY.	REPLY.
July 23rd. Is the entry on the monthly schedule correct? Dr Mill has drawn attention to the fact that about 1/2 inch fell on this date at neighbouring stations.	The entry is quite correct. There was no rain between 7.30 AM on the 23rd & 10.30 am on the 24th. There was nearly 10 hours bright sunshine on the 23rd. At High Hazels a branch station, to the East, 3 miles away, 0.037 in of rain fell on the 23rd. On the 24th 0.438 in fell there, & 0.234 in at Weston Park. Within the boundaries of the City of Sheffield, there is a difference of 18 inches in the rainfall within a year, as you will see by enclosed pamphlet. E. Howarth.

N.B.—This paper should be folded so as to bring the printed address outside, and be returned immediately.

Sealing is unnecessary, and defaces, or causes a gap in, the paper, which is to be filed in this Office.

(5481). Wt. 30262/7093. 1,000. 2/09. A. & E. W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

9 FEB 1910

Kept at The Hall, Thirsk

in the County of York, N.R.

by R. Bell

Rain Gauge
Pattern Copper Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 10 in.
" " " Sea Level 121 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Thirsk (N.E.R.)
Distance 1 mile Direction W.S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

6 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at The Stall, Thirsk.

in the County of York N.R. 2

by Reginald Bell

RAIN GAUGE
Pattern Copper Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 10 in.
" " " Sea Level 121 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Thirsk (N.E.R.)
Distance 1 mile Direction W.S.W. (true)

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.

1 JAN 1911

REGISTER OF RAINFALL IN 1910

For gge see other years

Kept at Thornton-le-dale

in the County of York 4

by Miss Ethel M. Priestman

Rain Gauge
Pattern
Diameter of top in.
Height of top above Ground ft. in.
" " " Sea Level ft.

Time of Observation 8 a.m.

Nearest Railway Station
Name Thornton Dale
Distance 1 m. Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. - in.
" " " Sea Level 126 ft.

Time of Observation 9 AM

Nearest Railway Station
Name Otterington
Distance 1/2 mile Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL. 4 JAN 1910

Kept at Sandbeck Park

in the County of York Ex

by Geo. Summers, J.P.

Rain Gauge: Pattern

Diameter of top 8 in.

Height of top above Ground 1 ft. – in.

" " " Sea Level 150 ft.

Time of Observation 9. a.m

Nearest Railway Station: Name Maltby

Distance 1 mile Direction NW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
11 JAN 1911

Kept at Sandbeck Park

in the County of York 6

by Geo. Summers

Rain Gauge
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 150 ft.

Time of Observation 9 . am

Nearest Railway Station
Name Maltby
Distance 1½ mls Direction NW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
24 JAN 1911

Kept at Ramsden Reservoir

in the County of ~~Lancaster~~ YORKS

by the Rochdale Corporation

RAIN GAUGE No 1
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 980 ft.

Time of Observation 9. a.m

Nearest Railway Station
Name Walsden. (L&Y. Ry)
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910.

Kept at Sowhall Hospital, Todmorden.

in the County of York 8

by F. Rogers.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 1020 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Todmorden.
Distance 1/4 ml. Direction E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

1 FEB 1910

Kept at Stanley Grange Wakefield

in the County of York

by H Stanley Haworth

RAIN GAUGE
Pattern Symons Snowmelting Gauge
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 240 ft.

Time of Observation 8 AM.

Nearest Railway Station
Name Westgate Wakefield
Distance 1½ Direction SW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

5 JAN 1910

FORM A. BRITISH RAINFALL.

Kept at Wentworth Woodhouse

in the County of Yorkshire, Div. IX.

by Alex' Third.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground ft. 10 in.
" " Sea Level 360 ft.

Time of Observation See Form B.

Nearest Railway Station
Name Wentworth and Hoyland Common
Distance 1½ Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground ft. 10 in.
" " " Sea Level 360 ft.

Time of Observation 9 AM

Nearest Railway Station
Name Wentworth & Hoyland Common
Distance 2 miles Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

4 JAN 1910

Kept at Park Hall Aislaby

in the County of Yorks. N. Riding [illegible]

by Revd. J. H. Richardson M.A.

RAIN GAUGE { Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft.
" " " Sea Level 500 ft.

Time of Observation 9. a.m

Nearest Railway Station { Name Sleights
Distance 1016 yards Direction N.W. ½ W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

-1 FEB 1910

Kept at Mount Villas - York

in the County of York

by S. E. Rowntree

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level c 70 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name York
Distance 1 m. Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
21 JAN 1911

Kept at Mount Villas - York

in the County of York 10

by S. E. Rowntree

RAIN GAUGE
Pattern
Diameter of top in.
Height of top above Ground ft. in.
" " " Sea Level 70 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name York
Distance 1 mile Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
3 JAN 1911

Kept at Heslington

in the County of Yorkshire - East Riding

by Lilla de Yarburgh-Bateson

RAIN GAUGE
Pattern Glaisher's
Diameter of top 8 in.
Height of top above Ground ft. 7 in.
" " " Sea Level 35? ft.

Time of Observation 9. a.m

Nearest Railway Station
Name York
Distance 2½m. Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
